

G. T. STRIKERS MOB TWO MEN

Mob of One Hundred Men
Kill Acting Conductor
and Brakeman

TENSION GETTING HIGH

It Will Take Very Little to
Cause Outbreaks of
Violence

Belleville, Ont., July 22.—As the result of a riot here last night on the arrival of the local train from Toronto, two men are lying in a critical condition in a doctor's hotel just opposite the Grand Trunk station. They are John McMann, who was acting as conductor of the train and M. Donovan, who was acting as brakeman. Both men left the train on its arrival and were crossing from the station to the street when a mob of about a hundred who had been in hiding for some time burst from their hiding places. In the struggle a couple of shots were fired. The mob disappeared as suddenly as it had come forward and the injured men were carried into the hotel. Shortly after, stones were thrown through the hotel windows.

U.S. May Take Action

London, July 22.—It is stated here that the U. S. government under a treaty may step in and compel the Grand Trunk to move all the undelivered freight shipped from the States and that is now lying at different points along their lines in the States and Canada. The United States customs officers are meeting at Port Huron to discuss the matter.

"There is much American bonded freight at different points at the present time," said an American official, who was in the city yesterday. "Bonded freight is just as important as mail."

Men are Restless

Detroit, Mich., July 22.—As the hour approaches for the redemption of the Grand Trunk promises that it will soon be operating its freight trains on its system now tied up by the strike, a vague restlessness characterizes the attitude of both sides of the conflict that began Monday night. The restlessness threatens to crystallize under the pressure of increasing incidents of violence, though both parties in the struggle are evidently trying with all their might to keep clear of trouble. From different points come indications of a determination on the part of the railway to move its freight and of an equally strong determination on the part of the strikers to prevent the restoration of the system to normal.

THOSE RUSSIANS ARE BACK AT WORK

At Their Work This Morning
Drinking Whiskey Flavored Water

The thirty Russians who stopped work yesterday and came to the city to interview the mayor by way of complaining about the water they had to drink and other things in general, are all back at work again this morning. The mayor, Commissioner Bouillon, and the city engineer visited the fair grounds yesterday afternoon and found out that there was really no cause for the kicking up of any dust. The conditions are the same as are found in any other sewer. There was nothing radically wrong with the water with the exception of the fact that the barrels in which the water was drawn to the men were formerly whiskey barrels and the water was slightly tainted with it, but in that is no real cause for complaint on the part of a Russian.

Another thing which the Russians were perturbed about was the fact that the foreman made them work too hard; wouldn't let them roll cigarettes while down in the sewers and so on.

No Report 'Til Month From Now

The report of the Royal Commission which investigated the Alberta & Great Waterways Railway Co., has been handed to the Lieutenant-Governor as yet, and it is not known when it is likely to be presented. Judge Harvey and Judge Fleet have been summoned to appear before the court yesterday. Mr. J. Scott received a telegram from Ottawa yesterday morning for Cooksing Lake yesterday. The Capital learns today from an unquoted source that the report is not yet ready and is not likely to be for some time. The judges have had a mass of testimony to go over and have found it altogether impossible to cover the whole ground in the time that has elapsed since the commission adjourned.

YOUNGSTERS SENT SISTER ON AIRRIDE

New York, July 22.—Harry Spero, a thirteen-year-old boy of 70 Rockaway avenue, with the assistance of some of his friends, built a machine which they thought would fly through the air. When the question arose, who should make the first flight, Harry was unshakable, and was willing to let any of his friends should have the honor. They respectfully decided, declaring they did not know enough about aviation. So they compromised on Harry's little sister, Alice, four years old.

In the absence of the family, they carried the machine to the roof of the three-story building, put sister Alice on the seat and pushed the contraption off. The machine rose slightly as the wind caught the wings, and then promptly doubled up, turned over and fell, spilling the occupant out in the back yard. She screamed and the boys ran for help. Then the police came and the injured child was put to bed.

STILL NO WORD FROM OTTAWA

How the Misunderstanding Took
Place in Regard to King's
Execution

CONVICT HAS NO HOPE

Spends Much Time in Prayer—
Has Made a Will, But It Is
Useless

Proceedings in connection with the execution of William Oscar King are at a standstill pending instructions from Ottawa. According to Mr. Justice Scott's and Sheriff Robertson's interpretation of the law, the administration of justice in Ottawa in the case of the Governor General intimate that there will be no interference on their part, with the execution. This intimacy must be sent to the Lieutenant-Governor of this province, and on its receipt the sentence will be proceeded with.

On the other hand the authorities do not see the point, and maintain that an order in council is not necessary, and are wondering why the execution is not being carried out. Judge Harvey and Judge Fleet have been summoned to appear before the court yesterday. Mr. J. Scott has telegraphed to the administration in Ottawa, who is understanding the Justice of the Supreme Court, explaining his position, but it is not known whether a satisfactory answer has been received.

Yesterday Mr. Scott received a long telegram from Ottawa concerning King, but it is thought that it is not what is required, as Mr. Scott has left town for Cooking Lake, and Sheriff Robertson has heard nothing more on the subject. The general opinion in official circles is that no interference will be offered, but nothing will be done until the law is clear.

King Realizes Position.

King himself has at last realized that there is no hope for him, and has been spending the last few days in prayer. When the question arose, who should make the first flight? Harry was unshakable, and was willing to let any of his friends should have the honor. They respectfully decided, declaring they did not know enough about aviation. So they compromised on Harry's little sister, Alice, four years old.

SEVEN NEGROES SHOT BY OFFICER

They Attacked Him With Pitchforks and He Used His Revolver

We want right now to put a stop to the system which permits of one set of paid officials discharging a third paid official. Under the present system the aldermen find it easy to escape responsibility. My idea of delegating authority to Commissioner Bouillon at \$10,000 a year and Butchart at \$2,000 a year is that it is the veriest kind of nonsense."

Having delivered himself of the above effort, Mr. J. A. Clark, at a meeting of the Edmonton Municipal Improvement League last evening proceeded to air his opinion of the aldermen of this city, who, he said, had hoodwinked the citizens for three years and it was time they were cleaned out holus bolus at the next election.

The meeting had been called in the first instance to discuss the removal of the aldermen, but was met in a few days, demonstrating that the whole of the civic administration and particularly Mayor Lee and Mr. Butchart, who Mr. Clark was of the opinion, did not favor the removal of the penitentiary because it might lower the value of some real estate in another part of the city, and for the same reason they did not want the street railway extension.

Draft Resolution

In its more or less rational moments the meeting decided on the suggestion of Mr. Latta that a committee be formed to draft a resolution to be forwarded to the Dominion Cabinet through the Hon. Mr. Graham, urging the exchange of property. Therefore, a committee consisting of Mr. H. Perry, president; Dr. Colkin, secretary, and Messrs. A. C. Sloan, Perkins, Latta, J. A. Clark, Robinson, Betz, Wilson and Watson was formed to draft a suitable resolution.

Colkins approved of the scheme but at the same time issued a warning that if the p. o. so required

DAMAGING FIRE VISITS GRANUM

Rooms Were Destroyed
This Morning

Granum, July 22.—A serious fire occurred here this morning after midnight in which a large amount of valuable property was destroyed.

The fire originated in a Chinese laundry adjoining Dixon's livery barn in the southern portion of the town and fanned by a stiff breeze from the south, blowing right across the town, quickly spread to the livery barn, the hotel, the billiard and pool room, all of which were burned to the ground.

So far as can be ascertained the loss on the Royal Hotel was over \$16,000 partially covered by \$10,000 insurance, on the livery barn the loss was over \$7,000 with \$4,000 insurance.

FATHER, COVICTED OF MURDERING CHILDREN, NOW PROVED INNOCENT

Tours, France, July 22.—A rag pic-
ker named Joseph, has confessed to
the assassination on April 21, 1901,
of five children of a farmer named
Briere in the vicinity of Chartres.

The father of the children was

found guilty of murder and sentenced

to life imprisonment. He died in

prison.

The trial of Briere attracted the attention of the whole of France. Four of his daughter, aged respectively 14, 11, 5 and 4, and his son aged 7 years, were found in bed one morning stabbed and beaten to death. The farmer was arrested and charged by the police with the crime.

The Police Theory

According to the theory advanced by the police, the children were killed by a tramp who had been staying at the home of Henry Bley, a colored farmer near Elliott. As the posse approached the negroes ceased their work in the fields and grubbing pitchforks and other farming implements made for the deputy. Bley, however, opened fire with two revolvers. The deputy surrendered, but was released to appear for further hearing tomorrow.

RECLAMATION SERVICE TRIES TO KEEP SETTLERS FROM ENTERING CANADA

Colin McCutcheon, of the provincial publicity bureau, called on Commissioner Hotchkiss this morning, at the parliament buildings and while the two were engaged in conversation a Capital reporter happened along and in consequence obtained a lot of new information concerning the methods which are adopted by the United States authorities, in their endeavors to prevent the tide of immigration of American farmers to Western Canada.

"Do many of them bite?" asked Mr. Hotchkiss.

"Oh, some do, but the great majority are wise and come through."

"I suppose you don't know on what the American papers base their remarks about American settlers returning to the states owing to their alleged dissatisfaction with Canadian conditions?"

How They Count Them

"Wait till I tell you something about that," smiled Mr. McCutcheon. "I know for a dead certainty that the farmers who come over here from the states and locate and then return to get their families and belongings are counted as American settlers returning to the states owing to their dissatisfaction."

"Yes, and a short time ago," put in Mr. Hotchkiss, "when I went down to the States, I am pretty sure that I was counted as a returning settler myself."

At this point the conversation wound up with a brilliant peroration by Commissioner Hotchkiss, in which he stated that the Caucasian race could not withstand the lure of land, and that now as in the primitive days people migrated to the west and north but never to the east and south.

Afterwards Mr. Hotchkiss stated that Mr. J. de Grever, representing the San Francisco Examiner, had asked him if he could come north to write for his paper. Mr. de Grever was astonished at what he saw, and has sent flattering notices.

"The Reclamation Bureau won't like that," said Mr. Hotchkiss.

five children in order to carry out his wishes.

Maintained Innocence

Briere stoutly maintained his innocence throughout the trial and declared that two tramps entered the house during his absence and killed the children. He added that he returned while the murderers were robbing the place, and that they attacked him and left him for dead.

During the trial the judge got down from the bench and gave loud expression to his opinion of the guilt of the prisoner, while the spectators yelled with fury, "Kill him, kill him."

Little Girl Cried for Father

A pathetic incident of the trial occurred when Briere's surviving daughter, whom the public declared only wanted the fate of the other children by her request, went to the witness stand and sobbingly protested that her father was innocent and begged the court to restore him to her.

HAMILTON GIRL ELOPES WITH EX-PRIZE FIGHTER

Hamilton, Ont., July 22.—A mild

sensation was caused today when word was received from Buffalo of the marriage of Miss Anna Pape, of that city, to Billy Papke, the middleweight champion of the world. The bride's father was not present at her marrying. Papke had the girl's name not to be denied, and while her father was in the old country and her mother was preparing to take her daughter to Europe to meet her father, Miss Pape and Papke eloped.

CALGARY'S INTEREST IN
EDMONTON

The Calgary papers, though they have retreated from the unreasonable attitude towards Edmonton's political campaign that they assumed at first, are still watching us closely. As evidence of this, note these two extracts. The Albertan says:

"The Edmonton Capital and some other west Edmontonians may not be gloating because there are short crops in some parts of Southern Alberta, but they make a sound that must resonance it."

Absolutely nothing has been said or done to justify this statement. The Herald has this to say:

"Edmonton may be pained, if having at last struck a season that promises a good year, she tries to make the most of it."

Surely the Herald is unwise, when its own people are so sensitive on the subject of crop prospects, to start in to knock other parts of Alberta as the above undoubtedly does. We are quite aware that for a number of years back new-comers have been told at Calgary that no crops of any account were being raised in central Edmonton. As a matter of fact, our farmers have had no complaint to make. A more prosperous and contented looking lot of people could not be found anywhere than at an agricultural gathering in this district during the past five years. We have never in this part of the province had anything approaching what would be called a crop failure. We don't figure to the same extent as other districts do in the grain export figures. But that, we maintain, is no test of development, as those whose knowledge of agricultural conditions is obtained from something else than the reading of newspapers, are perfectly well aware.

CROSSING THE RAILWAY
TRACKS

The railway commission has done well to urge that the city officials do all they can to safeguard the safety of the street cars to a greater extent at the points where the line crosses the C. N. R. and the G. T. P. With the constant growth of both railway and street traffic at these points, too great care cannot be taken. The interlocking signal devices are hardly sufficient even at the present moment. Something should be done for those who cross the tracks other than by street car. Both at Nanaimo and at First, the installation of gates and a watchman would be advisable. Ultimately, at the latter street, at least, a subway must be built.

With the completion of the district north of Norwood boulevard and the prospect of the Hudson's Bay reserve being disposed of at an early date, this is a question which we may soon have to face. It will be needed more than the C. P. R. subway on Jasper avenue by the time the latter is completed.

THE STRAWBERRY CROP

The display of strawberries, grown in the Edmonton district, which has been made of late at the Board of Trade rooms, is of considerable importance. The industry itself can be made a great success, those who have been experimenting with it for several years have demonstrated. But apart from this there is the general advertising the fact that these berries can be successfully grown here. It serves very effectively to dislodge people's minds of the idea that climatic conditions hereabout are somewhat akin to those at the North Pole. It is quite evident that there is a great deal that we have been importing simply because we haven't made the attempt to grow it ourselves.

FOR A GREATER EDMONTON

The interviews, which the Daily Capital has been obtaining and which it will continue to publish, in regard to the necessity of making a move

towards union between Edmonton and Strathcona before next year's census show that most people are alive to the requirements of the situation. The advantages are so many and so obvious that we fail to see why anyone on either side of the river should oppose the move. When the construction of the high level bridge was determined upon, it was decided that the two cities must have their interests in common. The majority of the people of Strathcona when that project is completed will be more closely in touch with the centre of Edmonton than several thousand of those within the Edmonton limits. If you are the Edmonton limit, under the conditions, is inevitable.

In older countries where similar situations have arisen, sectional prejudices made it difficult to bring about the desired result but these are always ultimately overcome. For instance, Birmingham has for some years had the chance of being recognized as the second city in the United Kingdom. This was bound to help everyone within its environs but the ancient boroughs of Kings Norton and Selly Park have held out against the idea. Now their opposition has been at last overcome and a Greater Birmingham is here to stay.

Edmonton Capital and some other west Edmontonians may not be gloating because there are short crops in some parts of Southern Alberta, but they make a sound that must resonance it."

Absolutely nothing has been said or done to justify this statement.

But that, we maintain, is no test of development, as those whose knowledge of agricultural conditions is obtained from something else than the reading of newspapers, are perfectly well aware.

Surely the Herald is unwise, when its own people are so sensitive on the subject of crop prospects, to start in to knock other parts of Alberta as the above undoubtedly does. We are quite aware that for a number of years back new-comers have been told at Calgary that no crops of any account were being raised in central Edmonton. As a matter of fact, our farmers have had no complaint to make. A more prosperous and contented looking lot of people could not be found anywhere than at an agricultural gathering in this district during the past five years. We have never in this part of the province had anything approaching what would be called a crop failure. We don't figure to the same extent as other districts do in the grain export figures. But that, we maintain, is no test of development, as those whose knowledge of agricultural conditions is obtained from something else than the reading of newspapers, are perfectly well aware.

Was Clever Man
London, July 21.—Confort was a man of splendid attainments. He had been a clergyman serving parishes in this city and at Nottingham. He was married and leaves a family. Some twenty-five years ago, he left the ministry to engage in business. Beginning in a small way as an outside broker, he built up a big patronage and during the South African boom the turnover of his brokerage house was larger than that of any similar firm in London; but while he was doing well, he was worried by the thought of his wife's infidelity. Physicians ordered him to take a long sea voyage. He sought recuperation by abstaining from his offices and in the meantime his affairs were allowed to drift until his affairs reached the bankruptcy court. His creditors met today unaware that the bankrupt had taken his life.

The gun was being moved to a dead angle. Sergeant Harry Dashiell, Gun Commander, Corp. Bradford; Gun Pointer, Pte. A. J. Sullivan; Private Duffy; Private King; Pte. Atkins. The dead artillerymen were attached to sixty-ninth company.

Good Man—Ah, my poor fellow, I say sorry for you. Why don't you work. When I was young, for ten years I was never in bed after five. An hour's work before breakfast, then four hours, then dinner, then four hours' more work, then supper, then bed, then up again at five next morning—

Loafers, I say, lass, where did you serve your time—Sing-Sing or Joliet?

Wife of New York Suicide Claimed
Body—He Was Minister

New York, N.Y., July 21.—The suicide found yesterday in the Colonial Park of this city, where he had shot himself in the mouth, was at first from papers in his possession, reported to be Arthur Hall, a London clercian. Later a woman, who said she was his wife, appeared at the office of Rev. Athelstan Confort, Hall's pastor, when applying for a burial permit declared her husband to be the Rev. Athelstan Confort, and said her own name was Edith Confort. She said

HUDSON'S BAY CO.

Calder

Which is now incorporated and known as West Edmonton was a farm only nine months ago. CALDER lots have a use and demand that other outside property has not. Why? Because there is employment for hundreds of men within a stone throw of Calder at the G. T. P. shops.

POINTS WORTH YOUR CONSIDERATION
Aside from the fact that the G.T.P. shops are adjoining Calder the Edmonton city limits is its boundary. You are, therefore, sure of the investment both ways—its nearness to Edmonton and its immediate demand as a home for the G.T.P. men.

Calder is a city in the making. First sale Oct. 1st, 1909; now over 10 dwellings have been erected.

Only 10 minutes walk from any part of it to the big roundhouse and shops.

CALDER at first prices is the same kind of investment that we once had when Hudson Bay lots were selling at \$200 and \$300 a lot in the heart of the present city of Edmonton. Buy now and make the profit yourself.

EXPANSION SALE

THE heavy increase in our BUSINESS demands considerable increase in floor space. Structural alterations and additions have been under way since spring, and now the time has come when it is absolutely necessary to have plenty of room to economically move the stocks in completion of the new arrangements. It will be more economical to make big reductions, sacrificing profits, than to waste time and labor and risk spoiling stock during the final stages of this expansion.

DIAGRAMS SHOWING RAPID AND CONTINUED GROWTH OF THIS BUSINESS SINCE 1886

SINCE 1886 the floor space required has increased from 600 square feet to 17,340; during the same time the regular staff has risen from 2 to 26. One cardinal rule was laid down by the founder of the firm, and that rule is: "A square deal to every customer." The same rule is now in force with every employee; it is too valuable to drop. In any city where this rule has been adopted the store has won out against all competition, and today there is not one firm doing as much aggregate business as W. Johnstone Walker & Co. in Edmonton.

Jack Brennan had two singles and made second on both occasions while Edwards, Clegg and Van Ward had the three hits of Dell.

The attendance was very poor last night, and a large number of fans missed the opportunity of seeing a grand game of ball. Manager Krueger has Collins, last year's star, Miller and Speiser yet to put in the box, so good contests are promised for the remainder of the week. The boys go away on Monday for a long road trip, so this will be the last opportunity to see them for some time. Intensely close box score:

SERIOUS CHARGE AGAINST MASON

French Masons of Montreal Are Charged with Luring Priests to Immoral Houses

Montreal, Que., July 21.—At a meeting last night the citizens moral organization appointed a committee to investigate the charges that the French Masonic lodge L'Emancipation, is engaged in a conspiracy, having for its object the luring of priests who come to Montreal to attend the Eucharistic Congress to the Catholic church to be held here in September, into a house of ill fame, under the idea that they are being taken to respectable boarding houses. The idea is to scandalize the church.

The charges were made by a man named Millett, who is employed in the L'Emancipation, French publishing paper, which is being conducted an Masonic campaign. Some of the accused were disposed to laugh at the charges in the letter but others regarded them as serious and after a debate the committee was named. It is stated by Mayor Guerin that it is instructed to report at once.

"You say Miss Van Gubbs inherited that lovely complexion?"

"Yes—her father was a painter, too."—Cleveland Leader.

On the covers of the new menu cards to be used by the Grand Trunk and Great Northern Pacific Railway systems, and also on the steamer of the latter corporation is a splendid photograph of Jasper avenue. The view was taken from the roof of the Sandison block and looks toward the west. This is a splendid advertisement for the city, and will create to the travelling public, a proper idea of the splendid appearance of Edmonton. The action of the railway is greatly appreciated.

were to fall into the clutches of state manipulators, the last state would be worse than the first. If the property could be retained for industrial sites the proposal would have his full sympathy.

Sloan Slings Fire
Mr. Sloan was fiery and fluent. On the subject of the council he said that there was no one except men who are tools, who instead of transacting the business, turn it over to Mr. So-and-So. The commissioners are found giving a portion of the concrete contract to a different company to that which the council had ordered. "Won't say the reason why," he concluded, "but you know."

He also referred to the expense of the Alex Potter investigation which had bad no good result; and the mention of the firing of the building inspector was a signal for a violent denunciation of all things civic.

Unit the Two Cities
The uniting of Edmonton and Strathcona was touched on and Mr. Clark pointed out that this year Edmonton and district will produce six million bushels of grain in North America and that the country can be far better advertised if sectional differences were eliminated which shows that there were glimmerings of rational thought brought to light at intervals during the meeting.

Plenty of smaller grievances were raised, Mr. Wright, an indignant ratepayer, thought the new Fire Hall should not be situated on First street, but nearer the centre of Norwood.

Harry Lauder's song, sung by a boisterous Scotch boy in Highland costume—Hoot mon' time be great. P. J. MacGregor will hold this delightful feature in half-hour concert in the Theatre on the Trail.

Each night fifty young Ruthenian singers sing at 8, 9 and 10 o'clock in the open air on the grounds, while in the Woodland Theatre charming programmes will be given by Edmonton's leading musicians: Dr. Harwood, Mr. Barford, Miss Pinckton, Miss Jean McIsaac, Madame Gagner, Mr. Nash, Miss Lansdowne, and two quartets.

There are many details in connection with the parade and the decorations which have not been finished for a couple of days.

It has been decided, however, that the Premier will arrive on the evening of August 8th, and that he will be accompanied by a military escort, which will convey him to his hotel. In the morning there will be the parade and the presentation of the address of welcome by the Mayor, the Prince of Wales, and the Lieutenant-Governor. That will end the civic reception.
